

Recognition of Project Excellence

Rapid Delivery SAP Quality Awards 2014

Excellence Winner

Bronze Winner

SAP Quality Awards 2014

This Project, distinguished for its quality and level of innovation in the category of **Rapid Delivery**, was delivered by **Stratesys** and enabled Fotowatio Renewable Vendures (FRV) to monitor in real-time and manage the critical maintenance processes of their many photovoltaic plants located around the world.

The Project was based on **SAP Business Objects**, a business intelligence solution which Stratesys implemented to manage and monitor FRV's solar fields and other related assets. Alarm detection and document management were also implemented to support improved response times, business agility and the user experience.

SAP Business Objects Implementation

Award in the category of **Rapid Delivery**

Currently, this solution is operational in three plants in Italy and one in Australia. Because of the solution's flexibility to business requirements and its technical capability to scale, it is planned to be further implemented in a total of 20 additional locations around the world over the next two years.

“The integration of SAP Business Objects with our Company's business processes has permitted, among other things, the integration and homogenization of data coming from many different sources that is available immediately and which gives us greater agility in the decision making process”

Alberto Martín, CIO (FRV)
