

EXCELLENCE Cloud Innovation Award at SAP Quality Awards 2014

SAP Quality Awards 2014

The project, awarded in the category Cloud Innovation, sits on the SuccessFactors platform as a system for managing talent and objectify work and employee performance. Stratesys, expert in the development and implementation of this solution, has been responsible for carrying out this work.

Through this tool Solunion establishes and coordinates a setting process, review and evaluation of the objectives for all employees of the organization, both corporate and individual, in a way that aligns individual goals with those of the company and identify those areas that need reinforcement within the organization. Furthermore, it provides updated information on the degree of achievement of said goals at all times.

SuccessFactors Platform**

Awarded with 'Excellence Winner' in the category of Cloud Innovation

Under a "cloud" model that reduces spending on IT infrastructure, Stratesys has adapted for Solunion Performance and Goals With SuccessFactors Calibration solution, which covers 400 professionals spread between Spain and Latin America.

successfactors™
An SAP Company

“Success Factors is contributing decisively to structuring and aligning our model of management by objectives in a easier and homogeneous way. The commitment to SAP SuccessFactors has been a success, because not only ensures proper management of corporate and individual objectives, but also enables the use of the system to incorporate future processes with rapid deployment and low cost”.

Sabine Weber, Corporate Director of Human Resources Of Solunion
