# ADVANCED ANALYTICS, PREDICTIVE AND MACHINE LEARNING

## DESIGNING A DATA DRIVEN STRATEGY TO IMPROVE DECISION-MAKING IN THE PURCHASING AREA

### + OBJECTIVES

Unified access and immediate graphical analysis of the management of expenses in all areas and departments and their evolution

Integration of data from different sources and comparison of the management of purchases of products, services and suppliers

Graphic display of historical data and detection of trends, deviations through graphic alerts

Simulation of scenarios, planning and prediction of expenses using Machine Learning functions

Self-consumption and agile visualization with Smart utilities (data discovery, insights, search...)

Collaboration, report scheduling and Office integrated

### + BENEFITS

#### Interactive

Interactive interface that allows for quick analysis and visualization of root causes

#### Visual

Graphic analysis of expenses and suppliers with multiple predefined breakdowns

#### Exportable

Data exportable to spreadsheets for further analysis or distribution

#### Plug & Play

Implementation time practically zero. Information updated daily
