INTELLIGENT SUPPLIER APPROVAL AND QUALIFICATION SYSTEM

Free your team for valuable tasks by eliminating manual and bureaucratic work through an agile and reliable system

U-Qualify is the system developed by Stratesys that automates the search and analysis of supplier approval and qualification documents, generating a score for each inquiry carried out, making it possible to select the supplier with the lowest supply risk.

- It guarantees that the documentation is always true and recent
- Enables regular searches according to the need for compliance
- Allows the purchasing area to approve or not the suppliers
- Monitor the regularity of suppliers and partners
- Allows integration with ARIBA SIMP/SLP e-procurement, meaning that suppliers no longer have to manually upload and update documentation

As a result, approval and/or qualification will be obtained safely and accurately, minimizing the risk of errors if it were a manual analysis.

Historical analysis of each provider

+ FEATURES

Automates loading and analysis of documents, allowing operational cost savings in the supplier approval process

Certifications are always updated thanks to the expiration management system, which automatically searches for the most recent versions of the documents

Speeds up the supplier approval process and guarantees the veracity and integrity of the information

Stand alone use or integrated with e-procurement

Attributes score to consulted providers

Documents archived in the cloud

Reduce access to portals, clicks and captcha validation

ORION
u-quality
by stratesys

Software for approval of companies with regional and international sources of verification

+ FUNCTIONALITIES

1

DOCUMENT SEARCH

- ✓ Supplier selection using taxpayer number
- ✓ Automatic search of documents on official sites of competent bodies
- ✓ Error handling and new search if the sites are not available

2

AVAILABILITY OF DOCUMENTS IN ARIBA SIPM/SLP

- ✓ Automatic attachment of the documents found in ARIBA
- ✓ Extracting useful information from documents through visual computing
- ✓ Complementation of information in the supplier profile in ARIBA

3

ANALYSIS OF INFORMATION OBTAINED

- ✓ Business rules configurations applying rates and weights to the data obtained
- ✓ Application of predefined business rules for each document/certificate

4

QUALIFICATION CALCULATION

- ✓ Calculation of the approval classification for the consulting provider according to the rules and required weights.
- ✓ Attribution of supplier classification in the ARIBA SIPM/SLP questionnaire

Observation: the list of documents that U-Qualify searches for is parameterized according to the country and the client's business rules

Consultations and international and regional documents on official sites

The supplier is informed if the classification is positive or if it is necessary to request corrections in the documents

Which areas are u-quality aimed for?

- ▶ Purchases and Supplies
- ▶ Cadastre/Registry
- ▶ Supplier Management
- ▶ Compliance
- ▶ Sales

Availability 24/7

Support in 3 languages
(Spanish, Portuguese and English)

No installation and infrastructure: it is a SaaS solution

It can be used stand alone or integrated with other platforms

+ BENEFITS

User

- Eliminate manual and bureaucratic tasks
- Reduce documentation search time
- Allows parallel searches of several companies at the same time
- Reduces the risk of errors in the decision to approve or not the suppliers
- Automatically performs supplier requalification during the contract period

Supplier

- Reduces reliance on third parties to get approval
- Provides more time to spend on proposals
- Eliminate manual tasks

Quality

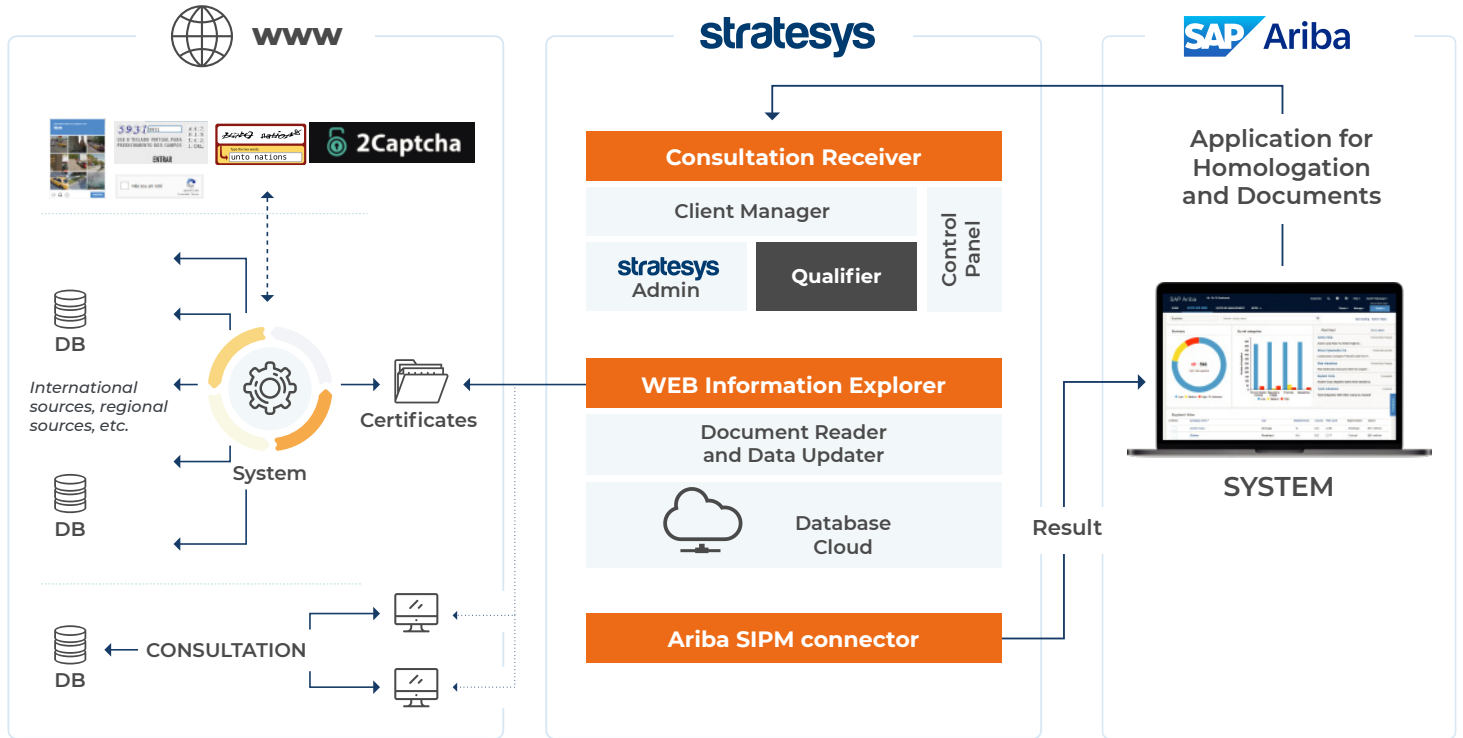

- Approval Control Monitor with integration with SAP UI5 interface
- Compliance with the most common security standards (Ethical Hacking Test and access to active directory data or supplier data)

Process and management

- Assures the correct compliance of the approval and qualification process
- Check the search history directly in the solution
- Allows comparison of historical results from the same supplier or comparison of scores from competing suppliers

+ CLOUD ARCHITECTURE

+ BENEFITS

Efficiency

Faster Approval and Qualification Process that aims to automatically search for and update documentation, reducing operational costs and freeing up the team for more strategic tasks

Reliable

Less errors and more objectivity in the approval and qualification of companies by score

Compliance

Allows traceability and auditing of the process by storing documents and research history in the cloud

Usability

Intelligent interface, allowing instinctive navigability in the appliance and faster decision making
